The effect of Adriamycin (ADM) on the nuclei of nucleolar cells of the bone marrow of mice was investigated in the first and second divisions of the cell cycle. The influence of the ADM was studied on the nuclei of nucleolar cells using the method of electron microscopy with cytophotometry. It was found that with a single ADM injection into the peritoneal cavity the nuclei of nucleolar cells of the bone marrow in the first division of the cell cycle are more sensitive to ADM than those of the second division. Adriamycin-induced changes in the nuclei of nucleolar cells of the bone marrow are similar to those in the nuclei of dividing cells in the mitotic cycle of the spermatogenesis.I am working with a Java Swing project that uses a JTree to display some data. The Swing component renders a JScrollPane on the default display area to display the tree. The data displayed is just a simple table. When the tree is initially loaded, I expect to see a blank "Tree" in the JScrollPane (This is a debugging tool and would be there even if the tree was not loaded in the first place). This is not what happens. The first node displays, but as soon as the second node is loaded, a blank area (while the tree is still rendering) is added before and after the first node, and then there is the tree. I have to click twice before the tree is displayed. It seems that the first node does not render correctly in this scenario. I do not see any exception
