Indigo Scape Standard is an Internet Management and Security Software System for Microsoft Windows platforms. Indigo Scape Standard offers basic Internet Filtering and Content Control for Networks in an integrated package at an attractive price for small businesses. Indigo Scape Standard is perfect for providing a rich user Interface with an Internet Console based and a Secure Web Browser and restricting Internet access to networked computer systems. Indigo Scape Standard is an Internet Management and Security Software System for Microsoft Windows platforms. Indigo Scape Standard offers basic Internet Filtering and Content Control for Networks in an integrated package at an attractive price for small businesses. Indigo Scape Standard is perfect for providing a rich user Interface with an Internet Console based and a Secure Web Browser and restricting Internet access to networked computer systems. Indigo Scape Standard Key Features: Internet Protocol Address Filtering The system allows you to filter Internet access and control the accepted IP addresses that connect to the networked systems on your network. This module uses a comprehensive block list of well known IP addresses. It can be used to block incoming connections to known bad or un-trusted Internet addresses. The same filtering can be done for a restricted set of incoming IP addresses. For example, you can block IP addresses of known virus and spyware distributors. Content Filtering Content Filtering blocks access to websites containing objectionable or unwanted content. For example, if you want to restrict access to the www.resellerratings.com website, you can configure the system to block access to this website. Users can be prevented from visiting all websites containing objectionable or unwanted content. Dynamic Web Page Filtering If you want to control access to websites by IP address or domain name, the system has the ability to dynamically change the access control. Mail Servers Block

You can choose to control the mail traffic to/from the mail server. Controlling Email is one of the most effective ways to prevent spam and forgery. Microsoft Windows Filtering The module allows you to control the Internet traffic coming from all Microsoft Windows networked systems on your network. The system allows you to control all incoming Internet traffic from Microsoft Windows based networked systems. The Microsoft Internet Connection Manager can be used to block Internet traffic from any Microsoft Windows based system on the network. The Internet Connection Manager can be used to block incoming Internet traffic from networked systems using the "Modem-Only" or "Connection Sharing" protocols. Microsoft Windows Interface The system allows you

Indigo Scape Standard Crack Full Version Free

The System includes many sophisticated features of Internet Firewalls. These include: – Proxies – Spyware Detection and Removal – Web Anti-Spam, Spam Email Filtering – Content Filtering and Content Blockage – Intrusion Detection – System and Network Security – Tracking and Alerting – Secure Web Browsers – Web Security – Additional features such as Online Shops, e-mail security, AV, and Information Security – Network Phone The Keymacro system includes many other features not listed here but these should be explained during your on-site demo. Keymacro also includes a feature that provides your users with a Secure Web Browser. This should be explained during your on-site demo. One of the most unique features of the Keymacro Firewall is that it can also act as a System Monitor and will generate a Firewall Log which will give you a detailed breakdown of Network activity. Keymacro will also help you to disable individual Web Browser sessions on the Intranet, for example, allowing employees to browse and print from a corporate Intranet but not allow Internet Web Browser sessions. Indigo Scape Standard is a web-based system, which means it is completely browser independent, there is no need for third party add-ons. Indigo Scape Online Indigo Scape is the first Internet Firewall Management Software on the market. A web based system, Indigo Scape provides you with a Secure Internet Browser as well as powerful system and network security controls. This provides our clients with a range of features not offered by other manufacturers, such as: - Internet Filtering - Spyware and Adware Removal - Web Anti-Spam - Content Filtering and Content Blockage - Intrusion Detection - System and Network Security - Tracking and Alerting - Secure Web Browsers - Web Security - Network Phone - Remote Password Management - Remote Logon Management All Indigo Scape clients can access all the security features from a Secure Web Browser which allows users to browse the Web without any risk of your Intranet being exposed to the Internet. The browser provides access to local resources such as Intranet Web Sites as well as the Internet. Using this function the user can browse the Internet and print to the corporate network without having to install a third party browser add-on. All Indigo Scape clients can also use our Secure
