Installation AutoCAD (x64) can be installed with the Microsoft Windows Installer 3.1 or higher, using the Administrative tools->Add/Remove Programs->View installed updates. Latest Version: 2018 x64, License: Autodesk and Subscription Preparation: Internet access is required to download the AutoCAD Installer file from Autodesk servers. AutoCAD web (download for desktop app): You can install the desktop app without internet connection. AutoCAD web (desktop app): The desktop app requires internet connection. To install the app, log in to the Autodesk website (After the Autodesk site loads, scroll down the page to the bottom and click the link for "Install AutoCAD" (expandable to "Desktop app"). Click "Submit" to accept the terms of service and to continue the installation. AutoCAD for Mac (download for desktop app): The desktop app requires internet connection. To install the app, open the Mac App Store and search for "AutoCAD". Download the "AutoCAD" application and click "Install". Click "Continue" to accept the terms of service and to continue the installation. Desktop App I'll do my best to update these instructions as the download for this app becomes available. Preparing the hard drive Backup all data that you need. I suggest using an external hard drive or network drive. Unzip the autocad.zip file to a suitable location, for example the desktop. Upgrade the.NET Framework To make sure that the file I'm about to download contains the latest features, I'll first install the most recent version of the.NET Framework. If I want to later upgrade the.NET Framework version, I can select "Manage" from the "View installed updates" page. If there is a new version, I will be notified and I can click to download it. Right click on the "Windows Updates" icon and select "View installed updates". Click "View Updates" in the left pane to open the window. If there is a.NET Framework 3.5 SP1 update, click "Check for updates". Wait for the download to finish and click "Install updates" in the upper right pane. Once completed, you can close

Q: Sorting a list in python, keeping an index value I have a list that is the result of a kmeans algorithm on a numeric input. The list has the format {'x':[0,2,1,1,3], 'y':[1,3,3,3,3]} and so on. I want to sort by the x value. However, the x value is the index of the list item and I need to keep this value. The result I need is something like: {'x':[0,3,1,2,1], 'y':[1,2,3,3,3]} Any help is appreciated A: This should do it: In [11]: lst Out[11]: [{'x': [0, 2, 1, 1, 3], 'y': [1, 3, 3, 3, 3]}, {'x': [0, 2, 1, 1, 3], 'y': [1, 3, 3, 3, 3]}, {'x': [0, 2, 1, 1, 3], 'y': [1, 3, 3, 3, 3]}, {'x': [0, 2, 1, 1, 3], 'y': [1, 3, 3, 3, 3]}, {'x': [0, 2, 1, 1, 3], 'y': [1, 3, 3, 3, 3]}] In [12]: sorted(lst, key=lambda x: x['x']) Out[12]: [{'x': [0, 3, 1, 2, 1], 'y': [1, 2, 3, 3, 3]}, {'x': [0, 2, 1, 1, 3], 'y': [1, 3, 3, 3, 3]}, {'x': [0, 2, 1, 1, 3], 'y': [1, 3, 3, 3, 3]}, {'x': [0, 2, 1, 1, 3], 'y': [1, 3, 3, 3, 3]}, {'x': [0, 2, 1, 1
