Roxio Platinum is a CD/DVD backup software designed to maintain your CDs and DVDs, as well as copy, rename and format them. The program contains two main components. Roxio Easy Media Server is an easy-to-use backup service that copies your CDs and DVDs to hard disk, while Roxio Smart Backup captures your entire optical disc library. Roxio Platinum Description: Magical Jelly Bean is a news aggregator for Google's Android operating system. It allows you to search for and read news, blogs, videos, pictures, and more, no matter where you are, whether you're connected to the Internet or not. It's extremely easy to install and use. Just install the application, and it will run in the background, searching for new content. When new content appears, Magical Jelly Bean will notify you. Magical Jelly Bean's main advantage is that it's both free and easy to use. There's no cost involved, and there's no need to enter personal information. You can add your own RSS feeds, and you don't even have to register an account, just search for what you're looking for and click the "Get Local News" button. Besides browsing the web, Magical Jelly Bean is capable of serving you a large number of web search results, too. You can search Google or Yahoo, and you'll find the same set of news and blog entries. It works on the Android 3.0 platform, and it's possible to manually send your favorite links to the application. It includes a phone, call and text messaging application as well. Magical Jelly Bean is powered by a desktop application. It does not require an Android-powered phone or tablet, and it is not an Android application. Magical Jelly Bean is free to use. You can download it from the Google Play Store. Super Cleaner is a simple and straightforward cleanup tool for people who want to get a clean, reliable, and affordable Windows PC. It includes several features, such as creating a registry scan, checking the system for errors, deleting system entries, and optimizing and repairing the hard drive. The software is capable of scanning the Windows registry, which is the central database of the operating system. It will analyze both 32-bit and 64-bit registry settings and eliminate the old ones and get rid of all invalid entries. The program offers a wide selection of options to perform a system scan, providing detailed reports on all suspicious items. You

So the list above will not include 'the' because it contains two 't's. If I use a brute force approach, I will run through every string and compare it to every other string and add it to a list if there are two matching strings. Is there a more efficient way to do this? A: You can use a collections.defaultdict with a count: from collections import defaultdict map
