The program should be tested before buying. Hi there, I need a react native mobile app. I need to be able to view the app in a web browser on a mobile device. This is a test app, I would like to do more and have you build the full app.

What's New in the Recruitment Manager?

Employment Manager 3D 4.0 is an essential tool for any business that needs to track the stages of a job recruitment process and the placement of a new hire. The software program enables HR managers to manage the whole recruitment process in real time, from the listing of a job vacancy to the final placement of a new hire. An intuitive and easy to use user interface makes it simple and fast for a new HR manager to become familiar with the tool within minutes. The available tools allow HR managers to manage, record and report on the activities of a job recruitment process, as well as providing general analysis and reporting tools. The features available for use within the software program include the following: * Job Listing – store and manage an unlimited number of job vacancies. Each job vacancy can be fully described with numerous employment keywords and requirements. * Job Posting – create a job vacancy from scratch, or edit a job posting that has been previously entered. Each job posting can include a user

profile, description and employment keyword matching. * Job Application – store and manage an unlimited number of job applications. Each application can be fully described with numerous employment keywords, requirements and a user profile. * Hire – allow HR managers to hire new employees within the job application and job vacancy lists. The hire process can be managed in 4 stages, including the application stage, 1st interview, 2nd interview and hire stage. Each stage can be configured to record a set of additional information regarding the hiring process. * Questionnaire – create a questionnaire that can be used to record personal information about job applicants. * Skill & Experience Interview – record interview answers for job applicants. There are 4 questions that can be asked in an interview. Each question can be configured with its own set of response options. * Skill & Experience Score – analyse job applications and hire new employees. The software program can determine an applicant's skills and experience based on their job application answers. * Skills & Experience Matching – identify the keywords that match the applicant's job application answers. * Recruitment Report – analyse and report on an HR manager's job recruitment process. The tool can record various recruitment activities as well as analyse, report on and store the data. * Interview Report – analyse and report on an HR manager's job interview activities. The software program can record various interview activities as well as analyse, report on and store the data. * Market Report – analyse and report on the current economic market conditions for different regions. * Recruitment Manager Software & Download: * Management – Manage and configure an unlimited number of

jobs and applicants within Recruitment Manager * Job Listing –
Create, edit and delete job vacancies within Recruitment Manager
* Job Application – Create, edit and delete job applications within
Recruitment Manager * Hire – H
