

I have tried to remove the line break from the rar but it did not help. I want to retain the .rar extension for this rar but convert the line break into a space such that it appears like this. any help would be greatly appreciated. Thank you UPDATE The file is a rar archive and I am trying to unrar it in python import os os.system('unrar -exk {} {}.rar'.format('c:/temp/test.rar', file)) I am trying to extract the files in the rar file and place them in a list. A: You cannot replace the newlines with spaces in the filenames (or anything else in the archive). Each line is a header and a file in the archive. To get the correct filenames, loop through the lines in the header. There's no need to do line by line because you can get the list of lines with the csv module, for header in csv.reader(inputfile): pass Read the header line, and use split(..., header=1) to split the line by the blank space and the colon. The first item from the returned list is the file name. The second item is the file extension. The file name includes all columns (including the filename) and a colon. That's the line of text that went into the Archive. for header in csv.reader(inputfile): file_name, file_ext = header.split(':', 1) print('{}'.format(file_name, file_ext)) The exact matching of the file extensions is done here import re import glob import csv def match(filename, file_ext, order=1): filename = re.sub('s', ' ', filename) filename = re.sub('\.{}\$'.format(file_ext), '', filename) filename = re.sub('s*', ' ', filename) return filename, file_ext filenames, ext = map(match, csv.reader(inputfile)) print(map(str.strip, filenames))
