Molten Heat Runes are new runes that burn enemies on contact. Molten Heat Flames are new fireballs that burn enemies on contact. We'd like to give a special shout out to Indie Wonder, as they have taken the time to cover Rune II: Decapitation Edition and work their butts off to provide great coverage for all of our readers! - David Sanicki With Rune II: Decapitation Edition, you have an opportunity to craft a runeword-based arsenal that will change the face of combat in Rune II. Already hard to recognize as anything but an evil-assed piece of shit, but somebody did the right thing and it's your job to damn well, so do it...Assemble the pieces you've been working on and get a feel for your content. The best thing is working on the music you can recognize, it's the easiest to work with and it's what people can tell if they don't get that "oh god, it's 7 minutes long and that's too long" feeling. There's nothing more valuable to a content writer than good input from your players and this helps do just that. Did I make myself clear on what this is? If not, let me try again. This is a working title for a story that I wrote for a mod by the name of Point 985. Here's what you have to work with. It's a 12 part score consisting of 6 chapters.

There are 4 main parts, and then 1 mini. Each part has 3 sets of tracks. The set in each chapter is the score for a set of chapters in a series. This mod is the story itself, there are no audio files for it, only the score. So it's not a document where you have every song in the score list, it's a work of music. There's no time value on the songs yet, so it's just a timeline of all the events in the chapters that are the original music you'll have in game. So, get the feeling of the chapters you want to work with, here are the set titles. Set #1: Emotional Desperation. Set #2: Addiction. Set #3: The Process. Set #4: Desperate Act. You're welcome to share these with a musician and help polish them, or even go into the details of what happens in the chapters. This is just my rough idea of how it's all going to go down. This is my first attempt at an official soundtrack, so be gentle and understanding. My goal here is to do the best I can to promote this mod, but also let

players know it exists in the first place. If I can do that successfully, then I'll do more along the way. If you have any suggestions, comments or more constructive criticism, feel free to reach out to me on Discord or by posting a comment. Not sure how to go about submitting this to Steam, so I did it as a google drive link. So you can still download the mod, I just don't want to put it
