

Firmware P2809350 Super efficient and compact, the P2809350 is a great cost-effective turn key true standalone router for managing your wireless network in your home or in the office. Its 4x4=3211 small size makes it ideal for fitting anywhere in your home and its high range wireless performance with superb range and reliability make it the ideal choice for a whole range of devices including smart TVs, tablets, smartphones and even PCs. Simple to use, the P2809350 automatically discovers your wireless devices, ensuring that the highest coverage is available and that they all work seamlessly together. Additionally, it lets you create virtual access points which you can easily add and manage from one central location, and it supports advanced Wi-Fi security features to keep your home network safe. Although the P2809350 is a standalone router, it can also be combined with the P2809550 for a fully integrated Wi-Fi system, managing all of your Wi-Fi devices using just one remote control. As an added bonus, the P2809550+P2809350 can also be connected to 3G dongles when using a SIM card for calling when abroad. Features Outstanding range and power combined with simplistic design means the P2809350 is a perfect solution for just about anyone. Its small form factor means it can fit into any corner or even on the shelf, and its clever design means it can be hidden out of sight. The P2809350 has four high-gain antennas to provide the highest performance with the least amount of interference, ensuring crystal clear reception and eliminating dropped signals from neighbours and signals reflected back to your network from things like masts and aerial wires. Wi-Fi Protected Setup (WPS) provides you with the simplicity of connecting to a secure network with just one click. WPS also makes it easy to connect your P2809350 to a device with Wi-Fi, or connect multiple devices simultaneously without the need for complex USB drives. When combined with the P2809550 you can create a Wi-Fi system for your home or office and control it all from one remote. Advanced Wi-Fi security features include Network Manager and WPA/WPA2 security, all of which protect your network from a wide variety of attacks. The P2809350 also includes a built-
