## What's New In Photoshop CC 2018 Version 19?

Ask HN: What are the most fun/interesting side projects you've worked on? - dasht79 This is kinda different, but it could be really helpful and encouraging to me:I have a couple more years of self-teaching to do in terms of computer science, mathematics, and programming. I have to come at the problem of programming from a slightly different angle than my peers. While I understand programming in a "globals, algorithms, if-statements, loops," kind of way, I almost have a harder time understanding it when it's applied to other fields - like game programming. I would love to find projects that were fun, and that were carried out not by someone with a degree. You know? You'd have to get me started. ===== billswift [ is amazing. And I didn't make it, but it's one of the most impressive things I've seen. ----- patio11 Yes, please please please have questions like this on every up-vote. This is exactly why I contribute to the community. If I get four answers like this I just might have to rename this site to the Programming Interest Community. ----- noduerme Here's another fun one. Start with the following open source app's exe's: Interactive Fiction Myst Elite The Game Monkey Island (HIGHLY recommend that if you read it, it's an amazing game) Prince of Persia Perfect Dark Shadow Warrior And make a game. I've been working on a dungeon crawler. Also, some of the open- source movie stuff is pretty interesting. ----- mattm I am currently working on an application that lets you create video tours. Here's the link: [ own-...](
