
Download ((BETTER)) JSpy RAT V0.08 Full Version

* Download JSpy RAT v0.08 Installation Guide 1- Download JSPY RAT v0.08 2- Use Winrar to decompress JSPY RAT 3- Run JSPY RAT and after the installation completes, it will ask you to restart your PC. 4- Check your C:\Program Files (x86)\JSPY RAT\exe for existing file named jspy.exe. If you find one, close it. 5- Double click on jspy.exe to launch the application and then click on the Log in button to log in to your admin panel. 6- Enter your Admin password 7- Click on the Settings button and then click on the Black List to enter the Black List. If you do not have a Black List, you can generate one. 8- To have access to everything, select

everything under the new account. 9- Click on the OK button and close the application.

10- Now you can click on the Black List to see the names of every malwares that the application has already blacklisted. 11- You can tick off the names of every malwares that you do not want to have access to in the future. 12- To keep everything under control, click on the Lock button and then click on the Unlock button. 13- You can lock the black lists. 14- Click on the Exit button to log off. jspy.exe 15- To remove a black list, click on the tick button and then click on the Delete button. 16- Click on the Save button to save the changes. 17- Now you can click on the Exit button to log off. 18- Now you can close the jspy.exe. Once you have jspy RAT v0.08 installed, you can click on the following URL to log in to your admin panel. Note: If the admin panel does not open up then there might be a problem with your internet connection or firewall settings. In this case, try the following: Click on the Settings button from the jspy.exe 2- To turn

off the firewall, click on the Turn Off button
Click on the Turn Off button again 3- Check
for an entry called Hosts and remove it if
