Open Office is the software suite that provides office productivity features such as word processing, spreadsheets, presentations, graphics, databases, and much more. It comes as both a stand-alone suite and as part of the OpenOffice.org, the open source software that was founded by Sun Microsystems. It can be downloaded for free from the OpenOffice.org website. OpenOffice.org consists of different applications that interact with one another, so that you can create, edit and view all files of the suite from any of the applications. When it comes to the word processor, OpenOffice.org presents the WYSIWYG or what you see is what you get (WYSIWYG) user interface, which gives you the feeling that you are writing on a Microsoft Word document. This feature is a significant plus, as it is one of the few applications that can bring the difference to OpenOffice.org. OpenOffice.org is not only an application, it also contains a document management system that can be used to organize, manage and share your files and documents. The OpenOffice.org suite can be run on top of Windows XP, Windows Vista, Windows 7, Linux, and Mac OS X operating systems. OpenOffice.org Standalone Free Version: Paint.NET is the software application that provides you with all the tools you need to edit images. It offers a tool that lets you fill different parts of your images with specific colors, as well as a tool that lets you create masks for editing your images selectively. Another tool that comes with the program is one that enables you to crop your images and apply a different kind of effect to them. Paint.NET enables you to edit your images of any format, such as JPEG, TIFF, BMP, GIF, PNG, WMF, EMF, PCX, PSD, IFF, TGA, and ANI. You can also work on various layers of your images, so that you can save your changes for later, as well as apply them to all of the layers in your images, or just to the visible ones. Paint.NET - the software application that allows you to edit images Image Viewer is the software application that enables you to view and manage all of the images on your computer. Agate MathGraph is a software program that helps you graphically represent your mathematical calculations, and even save your work. The user interface is highly intuitive, but not everybody will be able to work their way around the application because of the

lingo within it. This means that the program has been created specifically for people that have an extensive knowledge of math. That being said, on the left side of the main window you are able to input all the calculations you might need, while they are graphically displayed on the right one. The design of the interface is a bit outdated, resembling the classical one that was used in the Window '98 and '95. Agate MathGraph helps you draw Cartesian, polar and parametrical functions, as well as calculate the determined integral and a variation of function. Moreover, you can use it to find roots of the equation $f(x)=0$ on the set interval, along with the analytical kind of derivative. The color, style and width of the function are also available for change, so that you can clearly see the important parts of the graph that interest you. The program also enables users to save their work in a MEG file format, and also as a BMP, GIF or JPEG image. To sum up, Agate MathGraph is a useful piece of software that allows you to make graphic constructions and mathematical calculations, as long as you possess the mathematical knowledge required. MMSSM1411 MMSSM1411 is a software program that helps you manage your appointments. To do that, you can save the appointment, as well as specify the day and time of the day. A day and time is also saved as a calendar event, so you can track it from now until the next appointment. The MMSSM1411 also allows you to take notes of the appointment, as well as share it with other users. The installation process is simple, as it only requires you to do a backup of your phone. Once you've downloaded the application, you can do a backup of all the data in the phone, as well as the data on the SD card. Once the backup is completed, you can then continue by selecting the main application, and after that tapping the button on the bottom left side. One of the things that make MMSSM1411 different from other tools is that it enables you to see all the information regarding an appointment on the main page of the application. This way, you are able to know whether an appointment has been done or not, and the notes can be accessed when you press the ellipsis button on the bottom right side of the application. MMSSM1411 is a simple and useful tool that will allow you to manage your appointments, as well as
