E-mail is an important part of any business. It's the information system that allows your employees to quickly get information from around the world. In an organization, the e-mail system must be reliable and available to ensure that business can continue uninterrupted. But e-mail can also be a huge time sink for you, and with the sheer volume of incoming e-mail, even with your own highly efficient processes, it can become overwhelming. In fact, most business e-mail systems only make things worse. With an e-mail overload, the system is at risk of becoming unresponsive to customers and employees alike, and it could even lead to an e-mail outage. With that in mind, here are some simple things you can do
